

# Cleaning and Maintenance Instructions

---

FOR SMO, STARON, FURNITURE AND WORKTOPS

Ambiance Bain UK

AMBIANCE BAIN | 15 CRANFORD COURT, HARDWICK GRANGE, WOOLSTON, WARRINGTON, WA14RX

## Instructions

### SMO

Easy-to-clean, all currently available non-abrasive cleaning products may be used. Small surface scratches can be removed by using a light (grain **1500**) sandpaper and applying a suitable polishing cream. Both repair and polishing kits are available to purchase, please contact your local showroom.

### **WARNING**

Clean and rinse immediately if the item is in contact with an abrasive or coloured product.

- Do not use abrasive cream
- Do not use wire wool
- Do not use scouring pad
- Do not use ammonia products (be careful with hair dye)
- Do not use hot water over 60°C

### Staron

- Wipe the surface using a smooth cloth or sponge with soapy water or a neutral detergent and allow it to dry completely.
- Remove contaminants from the surface before they dry.
- If using hard water, the surface could become water stained. Do not allow water to remain on the surface. Wipe clean immediately using a smooth cloth.
- If coffee, tea, juice, or vinegar is spilled, wipe the surface with a smooth cloth or sponge and a neutral detergent. Wipe with a warm, wet cloth several times and allow the surface to dry.
- If oils are spilled, wipe the surface using a smooth cloth with an ammonia-based cleanser. Wipe with a warm, wet cloth several times and dry the surface.
- Using wax containing some abrasive or acid detergents could damage the surface of the product. Please clean with water and neutral detergent.
- Severe impact or excessive weight might damage the product.

For more info visit: <https://www2.staron.com/staron/asia/technical/maintenance.do?fx=fx>

## Furniture

- A suitable extractor must be used in all cases as excessive humidity or moisture ingress will cause the unit to fail.
- Occasional marks can be removed with a soft damp cloth, warm water, and a very mild detergent.
- Any water spillage must be wiped off immediately.
- Do not use harsh scouring powders or solvents, as they will damage the surface

## Worktops

Laminate worktops can be cleaned with mild detergent and water solution then wipe over with clean warm water, dry with a clean cloth.

While resistant to stains, mould, mildew, and bacterial growth. Any spillages should be immediately wiped clean.

For more persistent stains clean with a 50/50 mix of domestic bleach and warm water. Nonabrasive cream cleaners can be applied with a nonabrasive nylon brush for more stubborn stains, or you can try a magic sponge.
